

WHERE LEARNING IS AN ADVENTURE!

The New York Botanical Garden, based on a Victorian Royal Garden, reminds you of Mother Nature's tranquil beauty year round.

There are over 40 PhD scientists who work within the NYBG making it the largest horticultural science program in the world.

The Dale Chihuly special exhibition attracted thousands of new visitors to the NYBG who marveled at the beautiful glass sculptures in an unexpected botanical setting.

The Haupt Conservatory is the largest Victorian enclosed glass structure in the world.

Xtra Fun, Xtra Credit!

For adventurers 9+

Horticulture in Your Hood

How many kinds of plants are growing in your back yard or along your street? Walk around, take pictures and create a slide show to share the beauty of your surroundings.

Make Your Own Impressive Collection

Collect your favorite leaves or flowers. Snip the stems close to the base. Place them face down in a telephone book and place another heavy book on top. Don't disturb it for 10 days. Slowly open the book and you'll have beautifully pressed flowers & leaves!

Build It, Test It, Learn It!

Here's a fun Biology Lab from our Museum Access Education curated collection. To purchase this toy click the link below this document.
