NOT TO MISS...

"More Brass than Bloch"

It's a great time to catch up on past episodes! As many of you know, you can already see past episodes [on Amazon Prime](#), but now you can catch us on [Tubi TV](#) and [Pluto TV](#) too.

This quote will make perfect sense to some of you. If not, catch our visit to the [Neue Galerie](#) where Gustav Klimt's 'Woman in Gold' proudly resides. Museum director, Renee Price explains this interesting comment and shares this stunning museum's collections of Austrian and German art with us.

KUDOS TO KIDDOS

We just love seeing children enjoying museums in a whole new way. This little cutie was drawing the musical instruments in a display at the [Metropolitan Museum of Art](#) in NYC.

So next time you pack up the kiddos for a trip to a museum, don't forget to pack a pad of paper and some colored pencils!

FROM THE WORLD OF MATHEMATICS

Museum Access Moment

This exhibit caught our eye at the [National Museum of Mathematics](#) in NYC. Push a button and this mathematical sculpture starts spinning and then it blooms before your very eyes! Cool right?

Whether you're a little kid or a kid at heart, there's nothing like experiencing the sheer size of the exhibits at our country's great museums. Thanks for sharing May!

Museums for Date Night?

Why not consider a date night at your local museum with your sweetie? It's a great way to spend time together AND a study at the University of Pennsylvania showed it can have a positive impact on your mood and well-being. We like to call it 'Cultural Therapy'.

BEHIND – the – SCENES: THE MILWAUKEE ART MUSEUM

“What an absolute treat it was to visit with Chief Designer, David Russick at the [Milwaukee Art Museum](#) and learn just how much preparation goes

into a major exhibition like the 'Always New - Posters of Jules Cheret'. Transforming galleries into the streets of Paris for guests to immerse themselves in the period was a stroke of genius and that was only the beginning! So happy to be kicking off the new season with this wonderful museum."
