

WHERE LEARNING IS AN ADVENTURE!

We travel the world of museum collections in this special episode “Best of World History” with stops in **Egypt, China and Italy.**

**The Temple of Dendur** was given to the United States by Egypt in 1965 and it made it's new home at New York City's Metropolitan Museum of Art in 1967

**The Terracotta Warriors** guarded the first emperor of China's tomb for centuries until one of the figures was accidentally discovered by a farmer in 1974. The underground 'pits' are believed to hold more than 8,000 soldiers, 130 chariots with horses, 150 additional cavalry horses and more.

Many of **Leonardo da Vinci's inventions** had clear links to modern day life. From interlocking gears to flying machines, to the first bicycle, he had a clear understanding of engineering principles.

## Xtra Fun, Xtra Credit!

**Make Music with your own “da Vinci” Water Xylophone!**

*Materials Needed:*

- Glass Bottles with caps
- Food coloring
- Wooden Spoon

**Step 1** Fill each of the glass bottles with different levels of clear water.

**Step 2** Add a different color of food coloring to each of the bottles. A few drops should do. Add more drops for a deeper color.

**Step 3** Line the bottles up and you're ready to make music by tapping the side of the bottles with your spoon.

**Xtra Tip**  
For a louder sound, try using a metal spoon. Better warn Mom first!

Inspired by our visits to The Metropolitan Museum of Art, New York City, NY; The Field Museum in Chicago, IL; and Leonardo da Vinci - Machines exhibition
